DETAILED ACTION

Allowable Subject Matter

Claims 12-25 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art taken either singularity or in combination fails to anticipate or fairly suggest the limitations of the independent claim, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claim 12, with the allowable features being at least one permanently flexible or springy element disposed between said lens holder and said circuit carrier for biasing said component-equipped surface of said circuit carrier away from said lens holder and against at least one stop element forming a form-lock relationship with said lens unit(claim 12). Therefore claims 12-25 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nishikawa et al.(U.S. Pat. No. 2006/0202106) is pertinent to the application since it pertains to rigid circuit carrier with a semiconductor element and a springing element.
